

Construction Challenges of Cross Bay Link

20 May 2021 (Thu) | 6:30-8:00pm | Online via Zoom

At present, Wan Po Road is the only road linking the south-eastern part of Tseung Kwan O (TKO) to other areas.

Cross Bay Link (CBL) is a dual two-lane carriageway of 1.8km long with a cycle track and a footpath across the Junk Bay mainly on viaduct, connecting Wan Po Road near TKO Area 86 to Tseung Kwan O - Lam Tin Tunnel, which is also under construction. CBL, upon its completion, will be an alternative access route to the south-eastern part of TKO, thereby enhancing the road network of the area.

In this technical seminar, the construction methods of CBL will be highlighted.

Ir Wilson CHUNG

Engineer/8 (East)
Civil Engineering and Development Department,
Government of HKSAR

Ir Dr Jackie CHAN

Senior Resident Engineer (Quality, Environmental,
Health and Safety)
AECOM Asia Company Limited
